## **20<sup>TH</sup> ANNUAL BULL SALE**

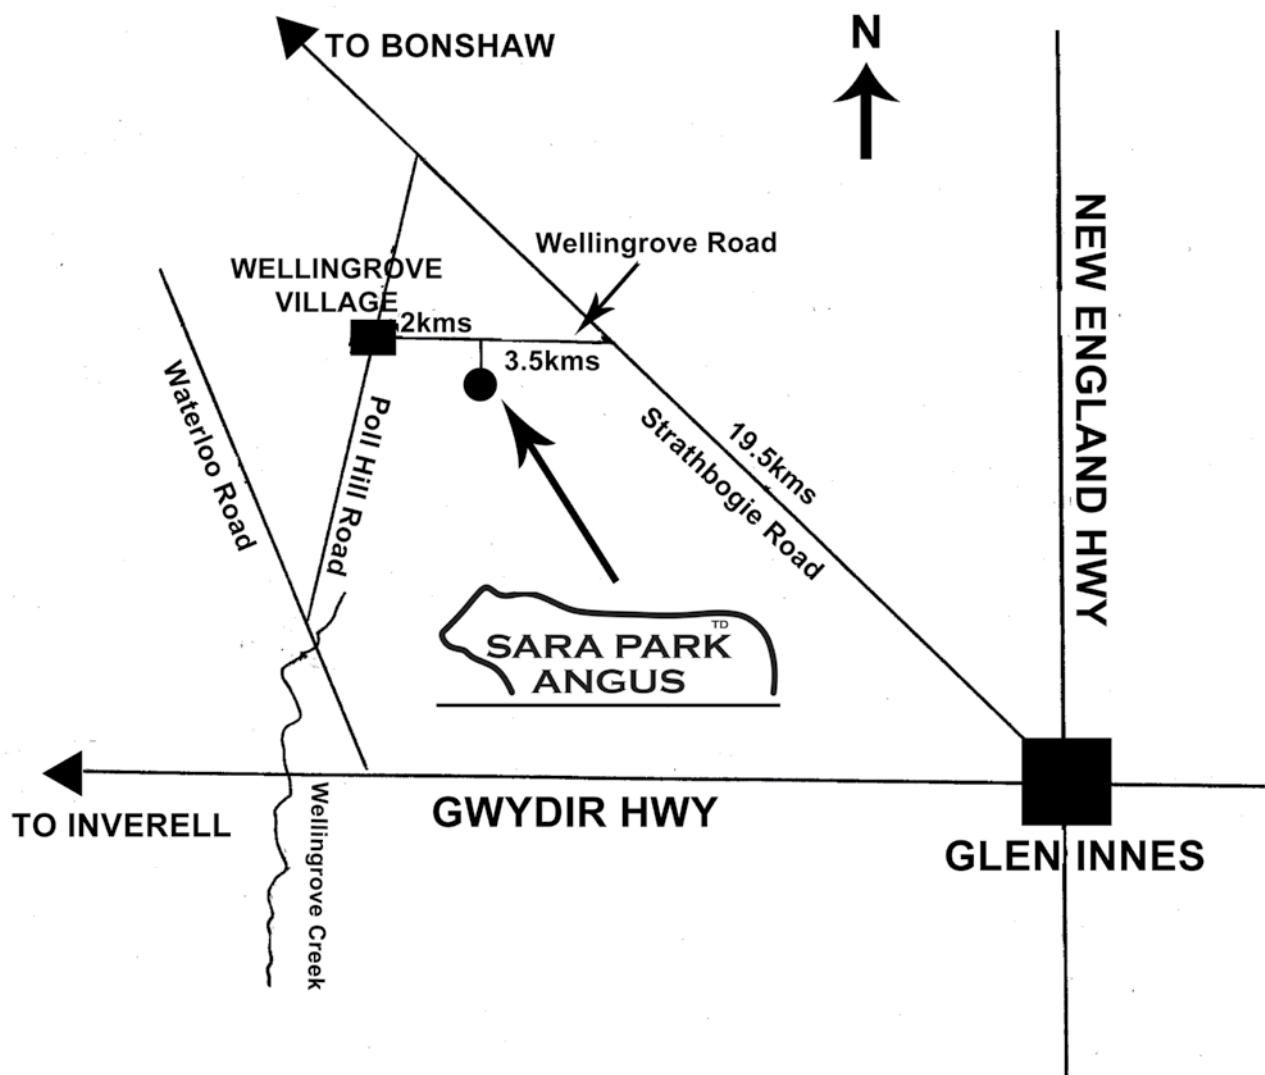

**FRIDAY 30<sup>TH</sup> JULY 2021**

**Commencing at 1pm  
at 'Rutherglen', Glen Innes**

**39 ANGUS BULLS  
INTERFACED WITH ELITE LIVESTOCK AUCTIONS**

Sara Park Angus is located approximately 23 km north west of Glen Innes. Travel 19.5 km on the Strathbogie Road then turn left on to Wellingrove Road. Our property "Rutherglen" (Sara Park) is 3.5 km further along this road, 2 km east of Wellingrove Village.

## 20<sup>TH</sup> ANNUAL BULL SALE

**FRIDAY 30<sup>TH</sup> JULY 2021**

**at "Rutherglen"  
Glen Innes NSW**

### **FEATURING 39 2 Y.O BULLS**

**Vendors: Herb, Jeff & Robert Duddy**

# WELCOME TO SARA PARK

Welcome to our 20th Sara Park Angus Sale.

Confidence in the cattle market has remained strong, with cattle numbers and producer demand being strong influences on our local market. After good rainfall and forecasts the market will continue to remain positive, making it an ideal opportunity to buy quality bulls to replace and rebuild breeding herds.

We extend our appreciation to our clients and repeat buyers for their continued confidence in our cattle over many years. Our aim is to produce bulls that perform well in commercial herds, and it is a testament from our repeat buyers that progeny of our stud bulls deliver well in the commercial market, consistently topping weaner sales in their districts.

Our 2021 draft presents new genetics for Sara Park. We believe our new AI reference sires Chiltern Park Moe M6 and Baldrige Beast Mode B074 are great herd improvers. We are extremely pleased with the power, depth and softness they are producing in our cattle. Reference Sires also include Sara Park Renown N53, Eaglehawk Double Vision M208 and Kidman Connect L74. With our own commercial herd in operation, we are very mindful of producing sires with confirmation, depth, growth and doing ability and the need to improve your herd. This year, the bulls have been prepared on oats and are ready for work. With such a solid presentation we have no doubt there is a bull in the catalogue to suit your particular preferences.

Our appreciation goes to Brad Newsome from Nutrien Livestock and Robbie Bloch and team from CL Squires Inverell for their time and effort leading up to this sale. Thank you to our clients, underbidders and friends for their ongoing support of Sara Park Angus. We wish everyone well with their purchases and wish all breeders well with their endeavours in the future.

Please join us for refreshments and a chat following our sale.

Herb, Jeff & Robert

## SALE INFORMATION

### GST

GST is to be added to the purchase price at the fall of the auctioneer's hammer. You will be invoiced the purchase price plus GST.

### REBATE

A 2% rebate will be offered to outside agents introducing buyers in writing 24 hours prior to the sale & settling within seven (7) days of invoicing.

### HEALTH

3 Day Sickness	10/11/20
3 Day Sickness Booster	22/12/20
Coopers Piliguard	10/11/20
7 in 1	03/03/21
7 in 1 Booster	20/05/21
Zoetis Dectomax	03/03/21

Sara Park is located in a Bovine Johnes Protected Area

### FERTILITY

All sale bulls have passed a thorough fertility examination carried out by Alan Post from the Glen Innes Veterinary Hospital. This examination includes semen viability, palpation of the reproductive organs and inspection of the penis and scrotum. Their scrotal circumference has also been measured by Alan Post.

### BULL PREPARATION

The sale bulls have been prepared on oats since mid May. Prior to that they had been on pasture grass. These bulls will present in excellent working condition.

### INSPECTION

Bulls may be inspected prior to the Sale by contacting the vendor or selling agents. Cattle will be available for inspection from 10am on sale day.

### REFRESHMENTS

A light luncheon will be provided on sale day – gold coin donation to Wellingrove Progress Association.

### ADDITIONAL DATA

Raw data including scan measurement, weights and other information will be supplied on sale day.

### INSURANCE

There is no vendor insurance on sale bulls. It will be the responsibility of the buyer to insure their purchases. Representatives from insurance companies will be in attendance and can offer insurance terms on sale bulls.

### WARRANTY

The vendor warrants that:

1. Bulls are fertile and capable of natural service within 6 months of date of sale to the purchaser ("Warranty Period"); and
2. Bulls are of the parentage catalogued.

**With the return of the bull the vendor will either:**

1. Provide a satisfactory replacement; or
2. Provide a credit for use at the next Sara Park Angus bull sale equal to the purchase price (excluding any costs and expenses of the purchaser in taking delivery) minus salvage value:

Where:

1. The purchaser claims a bull is infertile, upon purchaser submitting a veterinary report after the expiration of the Warranty Period stating that the bull is infertile or incapable of natural service and a Statutory Declaration by the purchaser to the effect that the substance of the report is true and correct. The veterinarian must state that in his/her opinion there is no evidence that the bull has suffered any injury or illness during the Warranty Period which could have affected his breeding ability. The veterinary report and Statutory Declaration must be forwarded to the seller within 14 days of the Warranty Period expiring.
2. The purchaser claims the bull is not of the parentage catalogued, upon purchaser submitting a DNA test or blood test within the Warranty Period indicating that the animal is not of the stated parentage.

The purchaser acknowledges that the purchaser does not rely and it is unreasonable for the purchaser to rely on the skill or judgement of the seller as to whether the bulls supplied are reasonably fit for any purpose for which they are being acquired.

To the extent permitted by law all other conditions and warranties implied by law in respect of the state, quality and condition of the bulls which may apart from this clause be binding on the Seller are excluded.

The seller has no liability (including liability in negligence) to any person for any loss or damage consequential or otherwise suffered or incurred by that person arising from the sale of the bulls to the purchaser.

***Please bring this catalogue to the sale to be sure of having one.***

## DELIVERY OF YOUR NEW BULL

**To help your new bull or bulls settle into their new home as well as possible, we recommend the following:**

All Sara Park bulls have been run in large mobs all their life, so they have had plenty of mates around, and have never been alone. It is a good idea to have some of your own cattle in the yard when your new bull or bulls arrive, a handful of steers or some PTIC cows or even an old bull, just something to keep them company, whilst they survey their new surroundings.

At Sara Park, we handle our cattle quietly and confidently, we always give our cattle respect, and our cattle respect us. We use a 4-wheel motorbike and a ute, with controlled use of dogs. **The bulls have not been handled with horses.**

Handle your new bull or bulls quietly and with respect and he will settle into his new home well and will be easy to handle when the need arises.

The bulls are in good joining condition at point of sale, but it is imperative to ensure good nutrition for the bull during the joining period. You should check the bulls regularly to see they are working especially in the early stages of joining when the majority of problems occur and early intervention can minimise the damage to the bull and to conception rates.

When joining is complete, bulls should be drenched and placed on good pasture to get back into first grade health without being allowed to get too over fat or too poor condition.

## SALE DAY SAFETY

All the sale bulls have been screened for temperament and are quiet to handle under normal circumstances. However, there are inherent risks associated with cattle handling. **Visitors Enter the cattle pens at their own risk. Children must not enter the yards.**

People entering the yards are at risk of injury. Be especially alert for bulls fighting and if one is playful with you, do not respond by patting his head. What a bull considers a playful nudge can break human legs! We do not expect the bulls to be aggressive with humans, but sale day places extraordinary pressure on them as they experience an entirely foreign environment. Remember the quietest bull is in fact an unpredictable animal.

Do not crowd the bulls or loiter inside the pens. We cannot cover every example of the dangers of cattle handling, so please use common sense and be alert at all times. Don't enter the pens unnecessarily. If you feel threatened whatsoever, please do not act hardy. The stigma of a person screaming as he dives over a fence is a preferable option to a broken body resulting from "standing up to" an unfamiliar beast.

Please call upon any of the agents for an escort through the bulls if required. The days of bravado with stock have passed under current OH&S legislation.

## FOR ALL OF YOUR FARMING, GRAZING AND NURSERY NEEDS...

## RECESSIVE GENETIC CONDITIONS

This is information for bull buyers about the recessive genetic conditions, Arthrogryposis Multiplex (AM), Hydrocephalus (NH), Contractural Arachnodactyly (CA) and Developmental Duplications (DD).

### Putting undesirable Genetic Recessive Conditions in perspective

All animals, including humans, carry single copies (alleles) of undesirable or “broken” genes. In single copy form, these undesirable alleles usually cause no harm to the individual.

But when animals carry 2 copies of certain undesirable or “broken” alleles it often results in bad consequences. Advances in genomics have facilitated the development of accurate diagnostic tests to enable the identification and management of numerous undesirable or “broken” genes.

Angus Australia is proactive in providing its members and their clients with relevant tools and information to assist them in the management of known undesirable genes and our members are leading the industry in their use of this technology.

### What are AM, NH, CA and DD?

AM, NH, CA and DD are all recessive conditions caused by “broken” alleles within the DNA of individual animals. When a calf inherits 2 copies of the AM or NH alleles their development is so adversely affected that they will be still-born.

In other cases, such as CA and DD, calves carrying 2 copies of the broken allele may reach full-term. In such cases the animal may either appear relatively normal, or show physical symptoms that affect their health and/or performance.

### How are the conditions inherited?

Research in the U.S. and Australia indicates that AM, NH, CA and DD are simply inherited recessive conditions. This means that a single gene (or pair of alleles) controls the condition.

For this mode of inheritance two copies of the undesirable allele need to be present before the condition is seen; in which case you may get an abnormal calf. A more common example of a trait with a simple recessive pattern of inheritance is black and red coat colour.

Animals with only one copy of the undesirable allele (and one copy of the normal form of the allele) appear normal and are known as “carriers”.

### What happens when carriers are mated to other animals?

Carriers, will on average, pass the undesirable allele to a random half (50 %) of their progeny.

When a carrier bull and carrier cow is mated, there is a 25% chance that the resultant calf will inherit two normal alleles, a 50% chance that the mating will result in a carrier (i.e. with just 1 copy of the undesirable allele, and a 25% chance that the calf will inherit two copies of the undesirable gene.

If animals tested free of the undesirable gene are mated to carrier animals the condition will not be expressed at all. All calves will appear normal, but approximately half (50%) could be expected to be carriers.

### How is the genetic status of animals reported?

DNA-based diagnostic tests have been developed which can be used to determine whether an individual animal is either a carrier or free of the alleles resulting in AM, NH, CA or DD.

Angus Australia uses advanced software to calculate the probability of (untested) animals to being carriers of AM, NH, CA or DD. The software uses the test results of any relatives in the calculations and the probabilities may change as new results for additional animals become available.

The genetic status of animals is being reported using five categories:

AMF	Tested AM free
AMFU	Based on Pedigree AM free - Animal has not been tested
AM_%	_% probability the animal is an AM carrier
AMC	Tested AM-Carrier
AMA	AM-Affected

For NH, CA and DD, simply replace AM in the above table with NH, CA or DD.

Registration certificates and the Angus Australia web-database display these codes. This information is displayed on the animal details page and can be accessed by conducting an “Database Search” from the Angus Australia website or looking up individual animals listed in a sale catalogue.

### Implications for Commercial Producers

Your decision on the importance of the genetic condition status of replacement bulls should depend on the genetics of your cow herd (which bulls you previously used) and whether some female progeny will be retained or sold as breeders.

Most Angus breeders are proactive and transparent in managing known genetic conditions, endeavouring to provide the best information available. The greatest risk to the commercial sector from undesirable genetic recessive conditions comes from unregistered bulls with unknown genetic background. The genetic condition testing that Angus Australia seedstock producers are investing in provides buyers of registered Angus bulls with unmatched quality assurance.

For further information contact Angus Australia's Breed Development & Extension Manager on (02) 6773 4618.

## HOW TO REGISTER with

# ELITE LIVESTOCK AUCTIONS

Simply go to **[www.elitelivestockauctions.com.au](http://www.elitelivestockauctions.com.au)** using your desktop, laptop, iPad, iPhone or android device.

Click on the **"Sign Up"** page / link

Create a bidding profile using the bidder registration page.  
*(You can either register as a livestock agent, company or private buyer)*

Agree to the Elite Livestock Auctions Terms & Conditions and the Selling Agents Sale Terms & Conditions as printed in the official Sale Catalogue

Click **"Register"**

You will then be notified by email that an account has been created.

Once an account has been created you are all **"Set to Bid"**

Each Auction can then be viewed by clicking **"Live Auction"** logo on the Elite Livestock Auctions website.

Once you receive email notification that your account has been created please go to the sale you wish to bid at and click **"Request to Bid"**

The sale will then approve your application to bid and on the sale catalogue you will see **"✓Bid Request Approved"**

On Sale day simply login, click **"Enter Auction"** on the catalogue page and you can start bidding.  
*(There is no need for software download)*

At the completion of the auction, invoicing will be carried out as per your registration details by the Selling Agents.

Having trouble registering and logging in?

Q112 – the youngest bull in the catalogue. Very correct bull with plenty of growth and extra bone. One of the favourites by all who have seen him. Maternal brother sold to Peter and Julie Donnelly last year who speak very highly of P11 who has grown in to a very good sire.
