## WELCOME TO SARA PARK

Welcome to our 22nd Annual Sara Park Angus Sale. Our mood was buoyed in December after being recognised among the top 20 sale averages for beef cattle in NSW, a great reward after many years of working on consistency, conformation and growth in our cattle. As a family we would like to say thank you for helping us achieve that significant milestone.

Our aim is to produce bulls that perform well in commercial herds, are structurally sound, can walk and yet perform in a feedlot or carcass situation. Underpinning our herd is always a strong female base; female fertility always remains the heart of a profitable cow calf operation. Our clients continue to report they consistently top weaner sales in their districts.

As a family we also continue to evolve and expand. This sale includes bulls from Duddy Angus, a daughter stud operated by the second-generation of Jeff & Kathryn Duddy and Robert & India Duddy. Through both programs we seek to give buyers more diversity of offering.

This autumn Herb had the good fortune to purchase "The Downs". This has allowed him to consolidate Sara Park's farming operations into two holdings. We welcome buyers to the first sale at "The Downs", a historically well-known property with excellent soil and pasture.

Sara Park's 2023 draft presents progeny of sires Milwillah Identity P219, Millah Murrah Klooney K42, Heart Ten Million M11, Baldrige Command, Farrer N9, Eaglehawk Double Vision M208 and Sara Park Q16. Duddy Angus will be offering 14 bulls from reference sires Sara Park Q16, Sara Park P9, Milwillah Identity P219, GAR Inertia and Musgrave 316 Stunner.

Sires were selected for traits we believe will improve both our own herds and those of our clients. With such a solid presentation we have no doubt there is a bull in the catalogue to suit you.

Our appreciation goes to Nutrien Livestock and AWN Squires for their efforts leading up to this sale. Thank you to our clients, underbidders and friends for their ongoing support of Sara Park Angus and their continued confidence in our cattle over many years. We wish everyone well with their purchases and future endeavours.

Please join us for refreshments and a chat following our sale.

Herb, Jeff & Robert

## **GST**

GST is to be added to the purchase price at the fall of the auctioneer's hammer. You will be invoiced the purchase price plus GST.

## **REBATE**

A 2% rebate will be offered to outside agents introducing buyers in writing 24 hours prior to the sale & settling within seven (7) days of invoicing.

## **FERTILITY**

All sale bulls have passed a thorough fertility examination carried out by the Glen Innes Veterinary Hospital.

This examination includes semen viability, palpation of the reproductive organs and inspection of the penis and scrotum. Their scrotal circumference has also been measured.

## **INSPECTION**

Bulls may be inspected prior to the Sale by contacting the vendor or selling agents.

Cattle will be available for inspection from 10am on sale day.

## **HANDLING**

At Sara Park, we handle our cattle quietly and confidently, we always give our cattle respect, and our cattle respect us.

We use a 4-wheel motor bike and a ute, with controlled use of dogs. The bulls have not been handled with horses.

## **REFRESHMENTS**

A light luncheon will be provided on sale day – gold coin donation to Wellingrove Progress Association.

## **ADDITIONAL DATA**

Raw data including scan measurement, weights and other information will be supplied on sale day.

## **INSURANCE**

There is no vendor insurance on sale bulls. It will be the responsibility of the buyer to insure their purchases. Representatives from insurance companies will be in attendance and can offer insurance terms on sale bulls.

## **WARRANTY**

The vendor warrants that:

1. Bulls are fertile and capable of natural service within 6 months of date of sale to the purchaser ("Warranty Period"); and
2. Bulls are of the parentage catalogued.

***With the return of the bull the vendor will either:***

1. Provide a satisfactory replacement; or
2. Provide a credit for use at the next Sara Park Angus bull sale equal to the purchase price (excluding any costs and expenses of the purchaser in taking delivery) minus salvage value:

Where:

1. The purchaser claims a bull is infertile, upon purchaser submitting a veterinary report after the expiration of the Warranty Period stating that the bull is infertile or incapable of natural service and a Statutory Declaration by the purchaser to the effect that the substance of the report is true and correct. The veterinarian must state that in his/her opinion there is no evidence that the bull has suffered any injury or illness during the Warranty Period which could have affected his breeding ability. The veterinary report and Statutory Declaration must be forwarded to the seller within 14 days of the Warranty Period expiring.
2. The purchaser claims the bull is not of the parentage catalogued, upon purchaser submitting a DNA test or blood test within the Warranty Period indicating that the animal is not of the stated parentage.

The purchaser acknowledges that the purchaser does not rely and it is unreasonable for the purchaser to rely on the skill or judgement of the seller as to whether the bulls supplied are reasonably fit for any purpose for which they are being acquired.

To the extent permitted by law all other conditions and warranties implied by law in respect of the state, quality and condition of the bulls which may apart from this clause be binding on the Seller are excluded.

The seller has no liability (including liability in negligence) to any person for any loss or damage consequential or otherwise suffered or incurred by that person arising from the sale of the bulls to the purchaser.

***Please bring this catalogue to the sale  
to be sure of having one.***

# BULL PREPARATION & HEALTH

## BULL PREPARATION

All Sara Park bulls were weaned on to pasture grass and have not been supplemented at all until preparation for the sale. These bulls have been fed a light ration of barley/DDG mix for six weeks prior to going on to oats on the 8th June where they stayed up to sale day, with no extra supplementary feeding. They will present in excellent working order.

Duddy Angus bulls were raised on native and improved pastures and have received supplementation on improved pasture in preparation for sale.

## HEALTH

### All Sara Park Bulls have been vaccinated with:-

3 Day Sickness + Boosters  
7 in 1 + Boosters  
Multimin  
Flukazole C

### Duddy Angus Bulls have been vaccinated with:-

3 Day Sickness  
7 in 1  
Multimin  
Selovin  
Vit ADE  
Flukazole

Sara Park and Duddy Angus are located in a Bovine Johnes Protected Area

## DELIVERY OF YOUR NEW BULL

### To help your new bull or bulls settle into their new home as well as possible, we recommend the following:

All Sara Park bulls have been run in large mobs all their life, so they have had plenty of mates around, and have never been alone. It is a good idea to have some of your own cattle in the yard when your new bull or bulls arrive, a handful of steers or some PTIC cows or even an old bull, just something to keep them company, whilst they survey their new surroundings.

At Sara Park, we handle our cattle quietly and confidently, we always give our cattle respect, and our cattle respect us. We use a 4-wheel motorbike and a ute, with controlled use of dogs. **The bulls have not been handled with horses.**

Handle your new bull or bulls quietly and with respect and he will settle into his new home well and will be easy to handle when the need arises.

The bulls are in good joining condition at point of sale, but it is imperative to ensure good nutrition for the bull during the joining period. You should check the bulls regularly to see they are working especially in the early stages of joining when the majority of problems occur and early intervention can minimise the damage to the bull and to conception rates.

When joining is complete, bulls should be drenched and placed on good pasture to get back into first grade health without being allowed to get to over fat or too poor condition.

## SALE DAY SAFETY

All the sale bulls have been screened for temperament and are quiet to handle under normal circumstances. However, there are inherent risks associated with cattle handling. **Visitors Enter the cattle pens at their own risk. Children must not enter the yards.**

People entering the yards are at risk of injury. Be especially alert for bulls fighting and if one is playful with you, do not respond by patting his head. What a bull considers a playful nudge can break human legs! We do not expect the bulls to be aggressive with humans, but sale day places extraordinary pressure on them as they experience an entirely foreign environment. Remember the quietest bull is in fact an unpredictable animal.

Do not crowd the bulls or loiter inside the pens. We cannot cover every example of the dangers of cattle handling, so please use common sense and be alert at all times. Don't enter the pens unnecessarily. If you feel threatened whatsoever, please do not act hardy. The stigma of a person screaming as he dives over a fence is a preferable option to a broken body resulting from "standing up to" an unfamiliar beast.

Please call upon any of the agents for an escort through the bulls if required. The days of bravado with stock have passed under current OH&S legislation.

## HOW TO REGISTER with

# ELITE LIVESTOCK AUCTIONS

Simply go to [www.elitelivestockauctions.com.au](http://www.elitelivestockauctions.com.au) using your desktop, laptop, iPad, iPhone or android device.

Click on the **"Sign Up"** page / link

Create a bidding profile using the bidder registration page.  
*(You can either register as a livestock agent, company or private buyer)*

Agree to the Elite Livestock Auctions Terms & Conditions and the Selling Agents Sale Terms & Conditions as printed in the official Sale Catalogue

Click **"Register"**

You will then be notified by email that an account has been created.

Once an account has been created you are all **"Set to Bid"**

Each Auction can then be viewed by clicking **"Live Auction"** logo on the Elite Livestock Auctions website.

Once you receive email notification that your account has been created please go to the sale you wish to bid at and click **"Request to Bid"**

The sale will then approve your application to bid and on the sale catalogue you will see **"✓Bid Request Approved"**

On Sale day simply login, click **"Enter Auction"** on the catalogue page and you can start bidding.  
*(There is no need for software download)*

At the completion of the auction, invoicing will be carried out as per your registration details by the Selling Agents.

Having trouble registering and logging in?

## RECESSIVE GENETIC CONDITIONS

This is information for bull buyers about the recessive genetic conditions, Arthrogryposis Multiplex (AM), Hydrocephalus (NH), Contractural Arachnodactyly (CA) and Developmental Duplications (DD).

### Putting undesirable Genetic Recessive Conditions in perspective

All animals, including humans, carry single copies (alleles) of undesirable or “broken” genes. In single copy form, these undesirable alleles usually cause no harm to the individual.

But when animals carry 2 copies of certain undesirable or “broken” alleles it often results in bad consequences. Advances in genomics have facilitated the development of accurate diagnostic tests to enable the identification and management of numerous undesirable or “broken” genes.

Angus Australia is proactive in providing its members and their clients with relevant tools and information to assist them in the management of known undesirable genes and our members are leading the industry in their use of this technology.

### What are AM, NH, CA and DD?

AM, NH, CA and DD are all recessive conditions caused by “broken” alleles within the DNA of individual animals. When a calf inherits 2 copies of the AM or NH alleles their development is so adversely affected that they will be still-born.

In other cases, such as CA and DD, calves carrying 2 copies of the broken allele may reach full-term. In such cases the animal may either appear relatively normal, or show physical symptoms that affect their health and/or performance.

### How are the conditions inherited?

Research in the U.S. and Australia indicates that AM, NH, CA and DD are simply inherited recessive conditions. This means that a single gene (or pair of alleles) controls the condition.

For this mode of inheritance two copies of the undesirable allele need to be present before the condition is seen; in which case you may get an abnormal calf. A more common example of a trait with a simple recessive pattern of inheritance is black and red coat colour.

Animals with only one copy of the undesirable allele (and one copy of the normal form of the allele) appear normal and are known as “carriers”.

### What happens when carriers are mated to other animals?

Carriers, will on average, pass the undesirable allele to a random half (50 %) of their progeny.

When a carrier bull and carrier cow is mated, there is a 25% chance that the resultant calf will inherit two normal alleles, a 50% chance that the mating will result in a carrier (i.e. with just 1 copy of the undesirable allele, and a 25% chance that the calf will inherit two copies of the undesirable gene.

If animals tested free of the undesirable gene are mated to carrier animals the condition will not be expressed at all. All calves will appear normal, but approximately half (50%) could be expected to be carriers.

### How is the genetic status of animals reported?

DNA-based diagnostic tests have been developed which can be used to determine whether an individual animal is either a carrier or free of the alleles resulting in AM, NH, CA or DD.

Angus Australia uses advanced software to calculate the probability of (untested) animals to being carriers of AM, NH, CA or DD. The software uses the test results of any relatives in the calculations and the probabilities may change as new results for additional animals become available.

The genetic status of animals is being reported using five categories:

AMF	Tested AM free
AMFU	Based on Pedigree AM free - Animal has not been tested
AM_%	_% probability the animal is an AM carrier
AMC	Tested AM-Carrier
AMA	AM-Affected

For NH, CA and DD, simply replace AM in the above table with NH, CA or DD.

Registration certificates and the Angus Australia web-database display these codes. This information is displayed on the animal details page and can be accessed by conducting an “Database Search” from the Angus Australia website or looking up individual animals listed in a sale catalogue.

### Implications for Commercial Producers

Your decision on the importance of the genetic condition status of replacement bulls should depend on the genetics of your cow herd (which bulls you previously used) and whether some female progeny will be retained or sold as breeders.

Most Angus breeders are proactive and transparent in managing known genetic conditions, endeavouring to provide the best information available. The greatest risk to the commercial sector from undesirable genetic recessive conditions comes from unregistered bulls with unknown genetic background. The genetic condition testing that Angus Australia seedstock producers are investing in provides buyers of registered Angus bulls with unmatched quality assurance.

For further information contact Angus Australia's Breed Development & Extension Manager on (02) 6773 4618.
